Re: Banning Loadout, ACT/007/034
 Permit Modification – Silt Fence Removal

Dear Mr. Haddock:

The Banning "Silt Fence Removal" modification was originally submitted on March 23, 2001. Recently, Gregg Galecki has indicated that this submittal has been reviewed and found to be acceptable. Gregg has, however, requested one additional upgrade to Chapter Seven of the Banning M&RP. This being the addition of a list, identifying the specific field and laboratory parameters required for the operational ground water monitoring program. This information has now been incorporated into Section R645-301-731.210, page 7-14.

Please find enclosed, five updated copies of Chapter Seven. These copies are intended to replace those copies originally attached to the March 23rd submittal.

Should you have any questions or comments concerning this information, please contact me at (435) 636-2872.

Sincerely,
 SOLDIER / DUGOUT CANYON MINES

David G. Spillman
